The Arctic ecozone is undergoing a rapid transformation in response to climate change. Establishing a baseline of current Arctic biodiversity is necessary to be able to track changes in species diversity and distribution over time. Here, we report a vascular plant floristic study of Katannilik Territorial Park, Kimmirut and vicinity within Circumpolar Arctic Bioclimate Subzone D on southern Baffin Island, Nunavut, Canada. We compiled a dataset of 1596 collections gathered in the study area throughout the last century, including 838 we made in 2012. The vascular flora comprises 35 families, 98 genera, 211 species, two nothospecies and seven infraspecific taxa, and we newly recorded 51 taxa in 22 families in the study area. We summarize the distribution on Baffin Island for each taxon recorded in the study area, including several unpublished southern Baffin Island records.
AUTHOR GUIDELINES
Authors are kindly requested to submit their manuscript only through the online submission module at www.phytokeys.com. In case of difficulties with the submission procedure, please contact phytokeys@pensoft.net. Full text of author guidelines is available at: http://phytokeys.pensoft.net/about#AuthorGuidelines

EXTRACTS FROM THE GUIDELINES

Body Text. All papers must be in English, checked by a native English-speaking colleague (if author(s) are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

WEB (HTML) links. Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the http:// portion of the address.

Citations within the text. Citations within the text: Before submitting the manuscript, please check each citation in the text against the references and vice-versa to ensure that they match exactly. Citations in the text should be formatted as follows: Smith (1990) or Smith et al. (1998) and Smith et al. (1998) or Smith et al. (1990).

REFERENCES. It is important to format the references properly, because all references will be linked electronically as completely as possible to the papers cited. It is desirable to add a DOI (digital object identifier) number for either the full-text or title and abstract of the article as an addition to traditional volume and page numbers. If a DOI is lacking, it is recommended to add a link to any online source of an article. Please use the following style for the reference list:

Published Papers:

Accepted Papers: Same as above, but “in press” appears instead of the year in parentheses.

CITATIONS OF PUBLIC RESOURCE DATABASES: It is highly recommended that all appropriate datasets, images, and information to be deposited in public resources. Please provide the relevant accession numbers (and version numbers, if appropriate). Examples of such databases include, but are not limited to:

• IPNI (www.ipni.org)
• Morphbank (www.morphbank.net)

• Genbank (www.ncbi.nlm.nih.gov/Genbank)
• BOLD (wwwbarcodelife.org)

Providing accession numbers to data mentioned in global data aggregators allows us to link your article to established databases, thus integrating it with a broader collection of scientific information. Please hyperlink all accession numbers through the text or list them directly after the References in the online submission manuscript.

INTERNATIONAL CODE OF NOMENCLATURE FOR ALGAE, FUNGI AND PLANTS. PhytoKeys will publish papers that strictly adhere to the rules of the latest edition of the International Code of Nomenclature for algae, fungi, and plants. Descriptions of new taxa (species and below) should include the following:

• a short Latin diagnosis followed by a full description in English, 2) a discussion of the distinctive morphological characteristics, ecology, geography, and/or reproductive biology, and 4) a statement on preliminary [at least] conservation status for the taxon being described.

OPEN ACCESS Fees. Publication fees in open access journals ensure a barrier-free distribution of your paper at no cost for the readers and include costs involved in processing, formatting, publishing, indexing and archiving your paper.

The journal charges Open Access Publication Fee. Please visit the “Article Processing Charges” section at http://phytokeys.pensoft.net/about#ArticleProcessingCharges to learn more of our discount and waiver policies.

PRINTED VERSION. Offprints and printed issues of the journal can be purchased additionally (see journal’s website). For standing orders/subscriptions please contact the Managing Editor.
