

Contents

- 1** Two new varieties of *Agapetes* (Ericaceae) from Xizang, China
Yi-Hua Tong, Xiang-Long Guo, Bing-Mou Wang, Zi Wang, Yong-Jie Guo
- 13** *Mallotus bullatus* (Euphorbiaceae), a new species from Southwest China based on morphological characters and phylogenetic evidence
Jiang-Hong Yu, Zheng-Ren Chen, Ming-Tai An, Deng-Li Yu, Feng Liu, Jian Xu, Yu-Bin Tang, Yi-Ran Wang, Hua-Kai Zou
- 27** Discovery of *Whittieria hengduanensis* sp. nov. (Ophioglossaceae) from Southwest China demonstrates a unique intercontinental disjunct pattern in plants between the Himalaya and the Americas
Zhen-Long Liang, Li-Bing Zhang
- 37** *Wedelia figueiredoana* (Asteraceae, Heliantheae), a winged cypselae new species of *Wedelia* for Brazil
Vinicius R. Bueno, Leonardo S. Rodrigues, Francisco Diego Sousa, Izaías C. Souza, Juliana Marzinek, Danilo Marques
- 51** *Elymus multiramus* (Poaceae), a new species from the north-western Qinghai-Tibetan Plateau, China
Yong-Chao Zhang, Xiao-Xing Wei, Yan Qin, Yong Liu, Shu-Zhen Zhang, Zhi-Feng Jia, Wen-Hui Liu
- 75** Reinstatement of *Struthanthus venetus* (Loranthaceae): an endemic species of central Mexico
Maria Guadalupe Maldonado-Borja, Mónica Isabel Miguel-Vázquez, Adolfo Espejo-Serna, Rosa Cerros-Tlatilpa
- 95** Morphological and molecular characterization of *Halumphora vantushpaensis* (Bacillariophyceae, Amphipleuraceae), a new diatom species widely dispersed on the shores of the soda Lake Van (Türkiye)
Elif Yilmaz, Romain Gastineau, Cüneyt Nadir Solak, Ewa Górecka, Rosa Trobajo, Monique Turmel, Claude Lemieux, Christian Otis, Andrzej Witkowski, David G. Mann
- 115** Insights to the taxonomy and phylogeny of the genus *Ptilagrostis* worldwide (Poaceae, Stipeae) with a key to species identification, checklist and outlines for further studies
Marta Krzempek, Ewelina Klichowska, Marcin Nobis
- 181** *Leontopodium nyingchiense* (Asteraceae), a new species from Xizang (Tibet), China
Wen-Qi He, Fang-Yu Zhao, Zhao-Fu Chu, Guo-Zhu Chai, Kai-Hui Zhao, Jing-Qin Tian, Bao-Xin Zhang, Fang-Yuan Zhang, Zhi-Hua Liao, Wei-Lie Zheng, Xiao-Zhong Lan
- 193** Resurrection of *Eurya degeneri* (Pentaphragmaceae), endemic to Kaua'i, Hawaiian Islands
J. Christopher Havran, Kenneth R. Wood, David H. Lorence
- 205** Taxonomic studies on the genus *Sanicula* (Apiaceae) from China (III): The morphology and distribution of *S. caerulescens* (Apiaceae), with *S. oviformis* reduced to a new synonym
Hui-min Li, Wei Zhou, Jun-wen Zhu, Chun-feng Song
- 223** The Araceae of Sumatra I: A new species of *Alocasia* from Aceh, Indonesia
Ni Putu Sri Asih, Ina Erlinawati, Yuzammi, Julisasi Tri Hadiah
- 231** *Cladopus yangjiangensis* (Podostemaceae), a new species from Guangdong, South China, redefining the phylogenetic relationships within *Cladopus*
Miao Zhang, Xiu-Ting Liu, Min Tian, Zhang-Xue Chen, Ying-Lin Huang, Guo-Di Chen, Bing-Hua Chen
- 251** *Rubus tingzhouensis* (Rosaceae), a new species from Fujian, China
Ming Chen, Gui-Can Lin, Tao Wang, Yi-Xue Zhuang, Yi-Xin Yao, Cheng-Zi Yang, Yuan Qin, Yan-Xiang Lin, Chang An
- 269** *Lysimachia pubiflora* (Primulaceae), a new species from Hubei, China
Han Xu, Song-Zhi Xu, Qi-Liang Gan, Zhen-Yu Li
- 277** A new species in *Begonia* sect. *Diploclinium* (Begoniaceae) from Guangxi, South China
Ping-Ting Hu, Yu-Ni Huang, Meng-Ni Zhang, Bi-Xuan Chen, Shu-Shu Huang, Ren-Kun Li, Wen-Guang Wang, Xin-Xin Feng
- 287** Phylogenetic and taxonomic studies of six recently-described *Stellaria* species (Caryophyllaceae) from China, with an additional new species, *Stellaria longipedicellata*, from Sichuan
Wenqiao Wang, Zhiwei Su, Zhonghui Ma
- 299** Two new species of *Salvia* (Lamiaceae) from the dry forests of Dominican Republic
Itzi Fragoso-Martínez, Gerardo A. Salazar, Emmanuel Martínez-Ambriz, Martin Reith

Agapetes forrestii var. *parvifolia* Y.H.Tong & B.M.Wang, var. nov.

FOCUS AND SCOPE

PhytoKeys is a peer-reviewed, open-access, rapidly disseminated journal launched to accelerate research and free information exchange in taxonomy, phylogeny, biogeography and evolution of angiosperms, gymnosperms, monilophytes, bryophytes, and algae. **PhytoKeys** aims to apply the latest trends and methodologies in publishing and preservation of digital materials to meet the highest possible standards of the cybertaxonomy era. **PhytoKeys** will publish papers in systematic botany containing taxonomic/floristic data on any taxon of any geological age from any part of the world with no limit to manuscript size.

PhytoKeys will consider for publishing works on the following topics:

- descriptions of new taxa, if they are accompanied with proper diagnoses, keys and/or distinction from close relatives or similar taxa
- taxonomic revisions of extant (or "recent") and fossil plant groups
- checklists and catalogues
- phylogenetic and evolutionary analyses
- papers in descriptive and/or historical biogeography
- methodology papers
- data mining and literature surveys
- monographs, conspecti, atlases
- collections of papers, Festschrift volumes, conference proceedings

Papers containing identification keys will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the *Creative Commons Attribution License*, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

AUTHOR GUIDELINES

Authors are kindly requested to submit their manuscript *only* through the online submission module at www.phytokeys.com. In case of difficulties with the submission procedure, please contact phytokeys@pensoft.net. Full text of author guidelines is available at: <http://phytokeys.pensoft.net/about#AuthorGuidelines>

EXCERPTS FROM THE GUIDELINES

BODY TEXT. All papers must be in English, checked by a native English-speaking colleague (if author(s) is/are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

WEB (HTML) LINKS. Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the <http://> portion of the address.

CITATIONS WITHIN THE TEXT. Citations within the text: Before submitting the manuscript, please check each citation in the text against the **References** and vice-versa to ensure that they match exactly. Citations in the text should be formatted as follows: Smith (1990) or (Smith 1990), Smith et al. (1998) or (Smith et al. 1998) and (Smith et al. 1998, 2000; Brock and Gunderson 2001; Felt 2006).

REFERENCES. It is important to format the references properly, because all references will be linked electronically as completely as possible to the papers cited. It is desirable to add a **DOI** (digital object identifier) number for either the full-text or title and abstract of the article as an addition to traditional volume and page numbers. If a DOI is lacking, it is recommended to add a link to any online source of an article. Please use the following style for the reference list:

Published Papers: Smith AR, Pryer KM, Schuettpelz E, Korall P, Schneider H, Wolf PG (2006) A classification for extant ferns. *Taxon* 55(3): 705–731.

Accepted Papers: Same as above, but "in press" appears instead the year in parentheses.

Electronic Journal Articles: Agosti D, Egloff W (2009) Taxonomic information exchange and copyright: the Plazi approach. *BMC Research Notes* 2: 53. <https://doi.org/10.1186/1756-0500-2-53>

Paper within conference proceedings: Kress WJ, Specht CD (2005) Between Cancer and Capricorn: phylogeny, evolution, and ecology of the tropical Zingiberales. In: Friis I, Balslev H (Eds) *Proceedings of a symposium on plant diversity and complexity patterns – local, regional and global dimensions*. Biologiske Skrifter, The Royal Danish Academy of Sciences and Letters, Copenhagen, 459–478.

Book chapters: Mayr E (2000) The biological species concept. In: Wheeler QD, Meier R (Eds) *Species Concepts and Phylogenetic Theory: A Debate*. Columbia University Press, New York, 17–29.

Books: Heywood VH, Brummitt RK, Culham A, Seberg O (2007) *Flowering Plant Families of the World*. Kew Publishing, 1–424.

Book with institutional author: International Commission on Zoological Nomenclature (1999) *International code of zoological nomenclature*. Fourth Edition. London: The International Trust for Zoological Nomenclature.

PhD thesis: Stahlberg D (2007) *Systematics, phylogeography and polyploid evolution in the *Dactylorhiza maculata* complex (Orchidaceae)*. PhD Thesis, Lund University, Sweden.

Link/URL: BBC News: Plants can recognise themselves'. http://news.bbc.co.uk/earth/hi/earth_news/newsid_8076000/8076875.stm

CITATIONS OF PUBLIC RESOURCE DATABASES: It is highly recommended all appropriate datasets, images, and information to be deposited in public resources. Please provide the relevant accession numbers (and version numbers, if appropriate).

Examples of such databases include, but are not limited to:

- IPNI (www.ipni.org)
- Morphbank (www.morphbank.net)
- Genbank (www.ncbi.nlm.nih.gov/Genbank)
- BOLD (www.barcodinglife.org)

Providing accession numbers to data records stored in global data aggregators allows us to link your article to established databases, thus integrating it with a broader collection of scientific information. Please hyperlink all accession numbers through the text or list them directly **after the References** in the online submission manuscript.

INTERNATIONAL CODE OF NOMENCLATURE FOR ALGAE, FUNGI, AND PLANTS. **PhytoKeys** will publish papers that strictly adhere the rules of the last edition of the *International Code of Nomenclature for algae, fungi, and plants*. Descriptions of new taxa (species and below) should include the following: 1) a short Latin diagnosis followed by a full description in English, 2) an illustration (line drawing or photograph) clearly showing the diagnostic characters, 2) a comparison of the new taxon with related taxa, a diagnostic key to identification of species-group members, or at least to the closest relatives is highly desirable and may be requested by the editors 3) a discussion of the distinctive morphological characteristics, ecology, geography, and/or reproductive biology, and 4) a statement on preliminary [at least] conservation status for the taxon being described.

OPEN ACCESS FEES. Publication fees in open access journals ensure a barrier-free distribution of your paper at no charge for the readers and include costs involved in processing, formatting, publishing, indexing and archiving your paper.

The journal charges Open Access Publication Fee. Please visit the "Article Processing Charges" section at <http://phytokeys.pensoft.net/about#ArticleProcessingCharges> to learn more of our discount and waiver policies.

PRINTED VERSION. Offprints and printed issues of the journal can be purchased additionally (see journal's website). For standing orders/subscriptions please contact the Managing Editor.
